

Electioneering Motion Fails to Pass in Meeting

Institute Committee Will Allow Class Mass Meetings For Forum Discussions

A motion to allow electioneering at Technology failed to pass at the closed meeting of the Institute Committee held last evening in the West Lounge of Walker, it was announced by the chairman, Donald B. Gilman '32.

The defeated motion was to the effect that the present ruling on electioneering be changed to read: "All forms of electioneering at the polls should be prohibited." In the discussion which followed it was suggested that THE TECH in the issue before election day, print small descriptions of all men running for the major positions.

It was also suggested that the Elections Committee attempt to create more interest in the forthcoming elections and that the announcement of the men elected be more widely publicized following the elections.

Another suggestion was to the effect that the Elections Committee hold impartial mass meetings in the various classes in which candidates for office might say a few words on their own behalf. However, there was no indication in this suggestion that other people could openly support a candidate.

Although none of these suggestions were in the forms of motions, Gilman stated that he expected the Institute Committee would interpret the present ruling to include them all.

MENORAH SOCIETY TO HOLD RECESS DANCE

Casting aside its traditional combined meetings with other colleges, the M.I.T. Menorah Society will present an informal dance during the week of vacation, on Monday, April 18. North Hall, Walker Memorial, will be the scene of the dance which will start at 9 o'clock and continue until 2 o'clock. A buffet supper will be served at midnight, after which the dancing will continue. All members and others interested in the Society may attend the dance which is priced at \$2.00.

Problems Peculiar To Low-Priced Cars Solved In Design Of New Ford

Also Articles By Professors Morris and Magoun In April T. E. N.

Special problems encountered and solved in the design of the new Ford car are described by C. A. Esslinger and Donald G. Fink '33 in this month's *Tech Engineering News*. These problems are peculiar to the low-priced automobile field, where strong competition makes it necessary to meet an unusually exacting cost schedule, and where it is necessary to design for an unusually wide variety of operating conditions.

Repeatedly stressed throughout the article is the fact that the new V-8 engine, although developing 65 brake-horsepower, is but 100 pounds heavier than the Model A engine, which develops only 40 horsepower. Several notable omissions in the design are mentioned and defended, especially the absence of free wheeling and central lubrication. Free wheeling was considered undesirable because of the high speeds obtainable by the car, and because of the difficulty of smooth automatic clutching at the high engine speeds — as high as 5,000 r.p.m. — developed by the new motor.

Origin of the Moon

Professor Frederick K. Morris of the department of Geology continues his interesting tale of the origin of the earth and its creatures with an account of the theories of the formation of the moon. The prevailing theory is that the moon started as a "thick, viscous drop gradually

FIVE STUDENTS PENALIZED FOR FILTER PAPER WORK

A. T. O. Awarded Plaque for Best Circus Concession

Alpha Tau Omega was awarded the plaque offered by the M.I.T.A.A. for the best exhibit or concession run by any group at the Circus. Its offering to the spirit of the Carnival was a pseudo ferris wheel.

Instead of having a revolving wheel, Alpha Tau Omega constructed a device whereby the passengers sat in a seat inside of a large paper-covered crate that hid the rider from the Circus crowd. To give the requisite sensation, the crate was turned by man-power, while the seat was rocked back and forth by a sweating freshman. A ride in this thriller was enough to make one dizzy for the rest of the evening.

DR. TRYON GOES ON LECTURE TOUR

Dr. James L. Tryon, Director of Admissions at the Institute, attended the meeting of the College Board in New York, last week, at which he spoke on problems of college entrance requirements.

Dr. Tryon then started a lecture tour which includes addresses in a number of middlewestern schools and colleges and Technology alumni groups. He will visit the Southwestern Technology Association at Kansas City, Mo., and the Rocky Mountain and Cincinnati Technology Clubs.

Dr. Tryon's itinerary includes Stevens Institute of Technology, Haverford College, University of Pennsylvania, Gettysburg College, Mercersburg Academy, The College of Wooster, Muskingum College, Ohio State University, Antioch College, University of Cincinnati, Purdue University, University of Chicago, University of Kansas, and University of Wyoming.

He has been invited to speak at various high schools on developments in engineering education, and during his tour he will confer with students who are planning to enter Technology next year.

ALL ACTIVITIES MUST BE DROPPED AS PUNISHMENT

Recommendation Of Committee Awaits Ratification Of Faculty

TWO FRESHMEN INCLUDED

Names of students connected with *Filter Paper* were disclosed at a special closed meeting of the Institute Committee yesterday afternoon. The Executive Committee announced that as a result of their recent investigation, five students have been found guilty of violating an Institute Committee ruling against the appearance of a *Filter Paper*, and at the same time the Committee recommended penalties for the transgressors.

The Institute Committee passed on the Executive Committee's recommendation. The suggested penalties now await only the ratification of the Faculty before becoming operative.

Text of Recommendation

Below is quoted a dispatch sent to THE TECH by the Institute Committee immediately following their secret session: "As a result of our investigation which has extended over the period from March 31 to April 11, we have come to the following conclusion:

"The names of those we have found to be connected with the *Filter Paper* are Howard H. Prestwich '35, Paul D. Germond '35, Libero F. Cappabianca '32, Domenico D. Giuffrida '33, and Edmund F. McLaughlin '32.

"There are others whose connections are more remote but whose names the Executive Committee feels should not be made public. With regard to the latter the Executive Committee recommends that a letter be sent to each stating the seriousness of his offense and warning him against further misdemeanor. The Executive Committee further recommends that the above five receive the following penalties:

1. That their names be published as having violated the ruling of the Institute Committee.
2. That letters to that effect be sent to their parents.

Lights Go Out At Wheelock Dance Given Last Week

More Than 300 Attend Joint Concert And Dance By Musical Clubs

One hundred and fifty couples attended the Wheelock combined concert and dance which was given last Friday by the Musical Clubs of the Wheelock School and Technology. Following the concert, which was well received, the old-fashioned square dances were enthusiastically performed.

While the dancing was progressing, the lights failed at about 11 o'clock. The trouble was due to a burnt-out fuse. Confusion was averted by the orchestra, which played as best they could while the lights were off. Quick work on the part of a repairman had the hall again lighted in a few minutes.

Sunday Concert Given

The Instrumental Club played before a large audience last Sunday at Bates Hall, Y.M.C.A., Huntington Avenue, Boston. These people were members and guests of the well-known "Caspy." This name when read backwards spells "Young People's Sunday Afternoon Concerts."

The Glee Club will give a concert this evening at the Grace Baptist Church in Somerville.

R. J. D.

All New Men In Scabbard And Blade Are From '33

At the Scabbard and Blade Formal Ball, the following men of the Class of '33 were elected members of the organization:

Clarence R. Westaway, Charles H. Thumm, Walter A. Shaw, Richard Robinson, James P. Mills, Albert M. Patterson, William A. Gray, George P. Bentley, Edgar B. Chiswell, Jr., Omar H. Somers, Gustave E. Kidde, James M. McMahon, Charles S. J. MacNeil, Charles E. Fulkerson, Edward L. Lockman, John R. Wiley.

Catholic Club Will Celebrate 25th Year With Informal Dance

Purse Of Silver To Be Awarded In Observance Of Silver Anniversary

Celebrating its twenty-fifth year as an undergraduate organization, the Technology Catholic Club will hold an informal Silver Anniversary dance next Friday in the Main Hall at Walker Memorial. In honor of the occasion a purse full of silver will be given to some lucky couple at the dance, though the method of selecting the couple was not divulged by the dance committee.

Members of the entire Federation of College Catholic Clubs, which include students in most of the local New England colleges, have been invited to attend. To avoid the overcrowding which marred the Club's last dance which was held on St. Patrick's Day, the Committee has decided to limit the attendance to 225 couples.

Art Marshall, with his ten-piece orchestra, will provide dance music. The chaperones include Sergeant and Mrs. Harold F. McDonnell, Mr. and Mrs. Victor J. Duplin, and Mr. and Mrs. Mark Croker. Tickets at 75 cents each may be secured from members of the Committee or at the door.

DuPont Company Publishes Letter Asking Cut In Government Expenses

Citizens Urged To Make Wishes Known To Congressmen And Senators

THE TECH herein publishes a letter from the E. I. DuPont de Nemours Company of Wilmington, Delaware. Copies of it are being run in all the papers of the nation: the letter is as follows:

To the Stockholders, Employees and Friends of E. I. DuPont de Nemours & Co.:

"The situation at Washington deserves your active and immediate attention. The National Government is spending more money every year than the previous year and you are one of those who must eventually pay the bill.

"According to the December estimate of the Secretary of the Treasury, the expenditures of the major departments and commissions of the National Government will, for the fiscal year ending June 30, 1932, exceed by \$1,231,000,000 those of 1927, when industrial activity was nearly at its peak and when prices of substantially all commodities and services were considerably above those of today. This was corroborated in the letter by statistics from the latest Annual Report of the Secretary of the Treasury by statistics comparing the total Governmental expenditures by main subdivisions for the fiscal years 1927 and 1932.

"To finance these ever-increasing disbursements, Congress is now planning huge additional taxes to be paid for out of the already shrunken income of prostrate industry and individuals.

"Taxes levied upon corporations and other producers increase the cost of their

RAILWAY LEADER TO GIVE ADDRESS AT GRADUATION

Sir Henry Thornton, Eminent Railroad Leader, Heads Large System

IS BRITISH SUBJECT

Sir Henry Thornton, president of the Canadian National Railways, will make the Commencement address at the graduation exercises on June 7, it was announced last week. Sir Henry's engineering works include the operation of railroads in the United States and England, as well as in Canada.

As head of the largest railway system on the North American continent, Sir Henry is distinguished not only for his achievements in organization, but for his remarkable ability to enlist the loyal support and arouse the enthusiasm of thousands of employees throughout the system.

Although he is a native of Indiana and was educated at St. Paul's School, Concord, N. H., and at the University of Pennsylvania, he is now a British subject. Sir Henry began his railroad career with the Pennsylvania Railroad in the year of his graduation as draftsman in the chief engineer's office, and held successively the positions of assistant engineer of construction on the Cleveland & Marietta Railway, topographer on various surveys, assistant on engineering corps, division engineer, and division superintendent.

While employed as assistant in the engineer corps of the Pennsylvania Railroad, Sir Henry was selected by the then general manager, Mr. L. F. Loree, to develop a student's course in transportation, and under Mr. Loree's instructions worked in every part of the railroad for a sufficient time to become familiar with all railway operations. In 1911 he was made general superintendent of the Long Island Railroad, which had been acquired by the Pennsylvania system. In this capacity he had much to do with the opening of the Pennsylvania Terminal in New York, and the organization of the electrical train service on the Long Island Railroad. In 1914 he was called to England as general manager of the Great Eastern Railway.

(Continued on page four)

products. Higher costs lessen sales, slow down industry, increase unemployment and want; all of which drive costs still higher and further increase distress.

"Taxes upon individuals have a similar effect by curtailing their capacity to purchase the products of industry.

"It is lower costs and higher purchasing power which we need today, perhaps more than ever in our history. Why are industries and individuals, which must reduce their expenditures to meet the depressed conditions, saddled with ever-mounting taxes to cover the ever-increasing expenditures of the National Government? Why should the confidence in the financial security of the Government itself be jeopardized by extravagance? Why does not Congress balance the National budget by reduction of expenditures through efficient operation and the curtailment of non-essential services and functions?

"Since the ways and means of curtailing Governmental expenditures are the responsibility of Congress, these questions should be answered by Congress. Your Senators and Congressmen are in a position to know whether the continuance of this deplorable condition is necessary. The future of industry and employment will be affected by your action. If you feel as I do, make your feelings known immediately to your political representatives directly, through your friends, your newspapers, your Chamber of Commerce, your trade associations, or other groups or individuals in a position to impress Congress.

(Signed) F. DuPONT,
President."

CONCRETE-MIXER COMPLEX

IT is a source of considerable worry to us, and we are still wondering when it became the custom for certain Technology students to indulge in the idiosyncrasy of what the Boston papers are so prone to call a "riot," whenever there is a handy concrete mixer nearby. If this custom keeps up, it will be well nigh impossible for a man from Course I or XVII to get a job on graduation. We can picture a prospective employer asking where the man went to school, and on hearing that he comes from Technology, answering in his sweetest tones, "Tech, huh? That's where men learn to riot when a mixer rumbles. Sorry, old man, we can't risk it." With the work at Building 6, it is a wonder that those childish "men" were not out every night having their pictures taken while sitting on dilapidated autos "wreathed in smiles of victory."

Student demonstrations and disturbances may have their place, and perhaps even defenders. It does seem, however, that Technology men are hardly the ones to stage the puerile and unenthusiastic demonstration of last week. A very few started it, and the same few led the small group of participants through their manouevers. By far the majority of the five hundred students who are alleged to have "gone on rampage," were present merely as spectators. Why should the actions of the small minority who break down the reputation of the Institute be condoned? They should not be.

Firemen, we admit, have their line of duty which probably calls for extinguishing even bonfires in open spaces with nothing closer than a hundred feet except a group of students. Nevertheless, we still maintain that it would have been the better part of valor for the Cambridge smoke-eaters to have stayed on Memorial Drive last week, particularly in view of the happenings of last May 18, which had not been forgotten. So far as we have learned, almost, if not all of the "cement-mixer demonstration" took place on the Institute "lot." One thing we have from authoritative sources: when an M.D.C. policeman came up on the parking strip and then retreated to the street fearing that enthusiastic students might take his hat, not a single man stepped off the curb to follow him. This one incident serves to indicate that we keep our fun at home. Perhaps the firemen should stay at home, too; but anyway such little demonstrations that look so big to the papers are to be avoided, and those responsible for them should be properly squelched.

FINAL ACTION

THAT the undergraduate body has reason to have confidence in its student government is amply shown by the action which the Institute Committee has taken regarding the *Filter Paper* which appeared against the expressed wishes of that body. An immediate and thorough investigation was begun to determine the authors of the scurrilous sheet, and last night the whole matter was brought to a close, on the twelfth day after the paper appeared. The prestige of the student body has been upheld.

In meting out the disciplinary action which it has, the Institute Committee has acted entirely within its authority, without aid from the Faculty or the Administration, and the action taken will probably meet with the approval of Technology men. Members of the group publishing and distributing the offensive paper have received penalties of varying degree, depending on the part they played in issuing the paper. In some cases the penalty is the most drastic that undergraduates can impose: complete barring of the offenders from all undergraduate activities for the remainder of their undergraduate careers. All registered students at the Institute are members of the M.I.T. Undergraduate Association, and to bar a man from participation in all activities means that he has been removed from membership in this group. So far as the undergraduates are concerned, he is no longer a member of their group. He is a man ostracised.

It is to the credit of the student body that the whole matter has been handled by them alone and that the Faculty and the Administration have taken no part in the proceedings. The Technology man has always proven himself capable of self-government, and this latest challenge to undergraduate authority shows that we are still capable of so doing.

There was something quaintly original about the Saturday performance of the "Queen's Husband," something which indicated that the cast was making an endeavor to uphold the traditions concerning the last performance of the activity which it has now superseded, by *divine* sanction of the Institute Committee, namely, Tech Show.

There was something vaguely appealing about the manner in which the Queen dropped her "Q's" here and there about the stage. Perhaps she wasn't minding her "P's" and "Q's" as well as she might have been, but that is another story. From the Lounger's previous experience he was of the opinion that this was merely a chronic condition of the larynx, possibly caused by some temporary derangement of the facilities.

There is the small matter of Little Benny, interloper of the 8.45 class, which has of late come to the Lounger's attention. Benny, we will have you know, is one of those freshmen endowed to Course VIII with sufficient brains to take some Sophomore subjects in addition to his other work. The only disadvantage encountered is that he often requires considerable of Professor Muller's time to go over very, very freshman-like questions. (This is no personal dig, of course.)

The crowning glory of it all came just the other day when the professor was deep in the abstractions of the physical science, and was even discoursing on some of the Einstein postulates, when our little hero chirped valiantly from the back row, interrupting the flow of knowledge from the floor, "Well, Bertrand Russell, in his *ABC of Relativity* says," — but he got no further. For once the members of the class could stand no more.

It has recently come to the Lounger's attention that those wicked, wicked boys who defied the note of authority issued from the sanctum sanctorium of the Institute Committee, definitely putting the Q.T. on a *Filter Paper* this year, have been apprehended. As a just and terrible punishment, in addition to other things, letters will be sent to their parents, informing them (the parents) concerning the magnitude of the offense. The Lounger can see, in his mind's eye, a sample of these missives, scorching their way through the United States Mails. It reads something as follows:

Massachusetts Institute of Technology
Cambridge A, Massachusetts
Institute Committee

"Dear Mrs. Avisscovolus; In re the recent issuance of that naughty publication, the *Filter Paper*, which we officially banned, we wish to say that (comma) it has been brought to our knowledge that your son was definitely connected with the publication of this.

"Now, Mrs. Avisscovolus, do you think it right that your son should have been responsible in part or parcel for such an

Opposite the new Waldorf Astoria

Home of the famous swimming pool.
The Shelton
at 49th and Lexington NEW YORK

When the Shelton opened (7 years ago) we began catering to college men and women. Gradually their patronage has increased; we feel safe in asserting that more students make the Shelton their New York home than at any club or other hotel. One reason for this is the free recreational features plus a desire to serve on the part of Shelton employees. Room rates have been greatly reduced. Rates from \$50 per month upward. A room from \$2.50 daily.

Club features (free to guests) are as follows: Swimming pool; completely equipped gymnasium; game rooms for bridge and backgammon; roof garden and solarium. Restaurant and cafeteria service at reasonable prices.

outrage to the Institute's reputation? Of course you don't. As a matter of fact, neither do we.

"Now don't get the idea that we are trying to tell you how to bring up your children, but still and at the same time, we think that you should take steps to correct this unfair attitude on the part of your son, and thus prevent the recurrence of a similar outrage (ahem).

We realize that this was all done in good clean fun, but really, Mrs. Avisscovolus, something must be done about this younger generation. Do you realize, Mrs. Avisscovolus, that fully one-third of the boys who matriculate here seem to have no idea of how they should conduct themselves when in the presence of Cambridge firemen and the Institute Committee? Not that we are criticizing the home training of your boy, Mrs. Avisscovolus, knowing it must have been excellent, but we really think that you should give him a sound talking-to, to make him realize the seriousness of his offense.

"Trusting that we will receive your hearty cooperation in this affair, Mrs. Avisscovolus, and hoping that our relations will be amicable in the future, we remain,

Very Sincerely Yours,

Institute Committee of the Massachusetts Institute of Technology.

NICHOLS HOOPSTERS LOSE TO SIGMA CHI

Fraternity Champions Lead All The Way To Win, 20-15

Nichols Hall, winner of the dormitory basketball championship, failed to defend the title they won so easily last year, and went down to a 20-15 defeat before the onslaught of an exceptional Sigma Chi team which had previously won the Interfraternity Conference tournament. The game, an annual affair, was played in the Hangar Gym last Saturday evening. The winners led, 10-8, at half time.

Vickery was the leader for the fraternity boys, sinking four baskets and two fouls for ten points to lead both teams in scoring; Rash, at the other forward position for Sigma Chi, made four. Joe Wetherell and Jack Lynch, with eight and five points, respectively, led the losers.

The summary:

BIOLOGICAL MEETING

There will be a meeting of the Sedgwick Biological Society tomorrow at 7.30 o'clock in the Emma Rogers Room of the Institute. There will be a short business meeting followed at 8 o'clock by a presentation of student papers in a competition to select the student to represent the Society in the competition for the Stratton Prizes. A social hour will follow. All interested are invited to attend.

TRACK TEAM HAS INFORMAL MEET

Saturday's warm weather brought out so many runners that Track Coaches Hedlund and Bowie decided to put on a handicap meet. As a whole the favorites came through in fine order. However, there were a few upsets which brought some newcomers to the foreground.

Greenlaw copped first place in the 60-yard dash, just barely nosing out two other

freshmen, Colby and Haggerty. Wrigley and Lockhart finished fourth and fifth respectively. The time was 6 2-5 seconds.

Jack Lynch beat Coon to the tape by inches to take first place in the 120-yard low hurdles in 15 seconds flat. Lockhart, Colby, and Pierce took the next three places.

Coon came back to take first place in the 60-yard high hurdles. His time in this event was 8 4-5 seconds. He was closely followed by Crosby, Pierce, Lockhart, and Bartlett.

Captain Jewett starting from scratch overtook the entire field to win the 660-yard run. Ed Rees, with a 45-yard handicap led the pack until the last 25 yards, but he could not stave off Jewett's strong finish. The time was 1 minute and 29 seconds.

RAILWAY LEADER TO GIVE ADDRESS

Sir Henry Thornton, Eminent
Railroad Leader; Heads
Large System

(Continued from page one)

During the World War, he was a member of the executive committee of managers which directed the operation of all English railway systems. He was also deputy director of inland water transportation, and held the rank of colonel in the Royal Engineers.

In 1917 Sir Henry was appointed assistant director-general of movement of railways in France. In 1918 he was a member of the commission appointed to investigate the operations and financial condition of the metropolitan water board of the City of London. His appointment as chairman and president of the Canadian National Railways came in 1922. He became a Knight Commander in the Order of the British Empire in 1919, and is a Companion of the Legion of Honor of France, and an officer in the Belgian Order of Leopold. He was awarded the Distinguished Service Medal by the United States.

Undergraduate Notices

JUNIOR BASEBALL

Baseball game with the Seniors on the Coop Field at 5 o'clock, this Thursday. All Juniors interested in supporting the class team are urged to be present.

PHOTOGRAPHIC SOCIETY

The M.I.T. Photographic Society will make its first trip of the season today to view the exhibit of winter scenes and winter sports pictures held by the Appalachian Club. Members will meet promptly in the lobby of Walker Memorial at 6.30 o'clock. They are urged to be present. Everyone is welcome, however. The annual exhibition of the members' pictorial work will be held in the Main Lobby near the end of the month.

BASEBALL GAME

Sophomores and Freshmen will play a practice game tonight at 5 o'clock. The game will be played at Coop Field. No teams have been chosen yet. Everyone come out and support your class.

PHYSICAL SOCIETY

Professor Brode will speak on "Wave Nature of Electrons" at a meeting of the Physical Society in Room 4-270 at 5 o'clock this afternoon.

RADIO SOCIETY

At the coming meeting of the Radio Society to be held in Room 10-275 Thursday, April 14, at 5 o'clock, Roger E. Phelps '23, will speak about the Hingham monitoring station of the Radio Service of the Department of Commerce. In his talk, Mr. Phelps will discuss the new method of field strength measurement which has been developed by the Bell Telephone Laboratories.

Mr. Phelps was secured by the courtesy of Mr. Kolster, the Radio Inspector for New England. He is a graduate of Course VI-A and is now in the employ of the Department of Commerce.

As We See The Movies

(Continued from page two)

tions of bigamy only to have her first husband return on the eve of her son's engagement to blight the happiness that had been hers since her second marriage. To divulge the outcome of this crisis would destroy the force of the stirring scene which climaxes the picture. It is the familiar "hokum," to be sure, but cut so delicately as not to appear as such, contrary to the old adage.

Miss Best is a perfect example of that soft English beauty so evident in facial advertisements, but possessing a much warmer personality than her usual British sister, and an appealing voice. Herbert Marshall, her husband in real life, as well as her second choice in the story, gives the polished performance expected of an English actor; also with feeling. The synchronization is clear and the photography includes many closeups of Miss Best with a clean victory for the lady over the camera in each encounter. W. L. S.

R.K.O.-BOSTON

"Young Bride"

Those self-appointed prophets who, with the advent of the talking pictures, predicted the passing of vaudeville as a living part of the American theatre should visit the R.K.O.-Boston Theatre this week to learn how thoroughly mistaken they were. At yesterday's performance hundreds of persons stood waiting to witness a show which featured the personal appearance of Benny Rubin, the screen comedian, and Jack Haley, the musical comedy star.

Benny stole the show with his informal chatter, though the rest of the stage features were almost equally good. Miss Lillian Shade presented a few vocal numbers in the ultra-modern style, and the team of B. & B. Harris, with Loretta Allen displayed their bulging muscles for the approval of those present.

Helen Twelveteens held forth upon the screen in a fairly good production entitled "Young Bride," which unfolds once more the tale of the poor working girl. The usual short subject, including news, comedy, cartoon, and a selection by the orchestra, under the baton of Larry Flint, completed the program. J. M. K.

R.K.O.-KEITH'S

"The Cohens and Kellys in Hollywood" Hollywood is once more dealt a blow by the satire of the current film at the R.K.O.-Keith Theatre, "The Cohens and Kellys in Hollywood." In this picture the laughs and burlesque of the Cohen-Kelly theme are intermingled with the pathos of rapid-rising and swifter-falling luminaries of filmdom.

Charlie Murray and George Sydney play their familiar roles in this talkie. Romance is furnished by June Clyde and Norman Foster. Some of the gags are new but most of them are threadbare.

Opening in a small town, where Kelly runs a "one-arm" joint and Cohen is the proprietor of the local moving-picture house, the action soon shifts to Hollywood, where Kelly's daughter enters the movies. With fame the Kellys become "uppity" and scorn the Cohens. The latter soon are sitting on top while their Irish friends have sunk into oblivion. I. S. B.

TECHNOLOGY STUDENT RECEIVES HONOR KEY

Eugene F. Lynch, treasurer of the Technology Catholic Club, was awarded the Newman Honor Key by the New England Province of the Federation of College Catholic Clubs at a meeting of officers held last Sunday.

This key, five of which are awarded each year, is given to officers of the clubs who have contributed most for the betterment of the various clubs and of the Province as a whole during the year.

All Activities Must Be Dropped As Punishment

Recommendation Of Committee Awaits Ratification Of Faculty

(Continued from page one)

3. That memorandum be sent to the Dean and to the heads of their departments.

4. That they be barred from all undergraduate activities including athletics for the remainder of their undergraduate careers at the Institute.

"It is felt by the Executive Committee that this last provision will bear most heavily on the two freshmen whose responsibility appeared to be somewhat greater.

"The Executive Committee is aware that there may possibly be others connected with this publication, whose names it has been unable to ascertain. These names we understand are known to certain members of THE TECH staff, who have learned them in strict confidence. We respect this confidence."

Freshman President Objects

After the reading of this recommendation, Edward J. Collins, Jr. '35, freshman president and ex-officio member of the Institute Committee proposed the motion that if the freshmen implicated in *Filter Paper* caused no further trouble until their Senior year, they should be released from the punishment at that time, and should be free to participate in activities at that time. This motion was carried.

Girls vote for PIPES (for men!)

ASK any girl you know to name her favorite smoke—for men! Ten to one she'll say a pipe!

She's discovered—trust her bright little eyes—that it's the BIG men, on the campus and off, who welcome the mental stimulation and relaxation they get from this real man's smoke.

And if she's very wise in the ways of smokers, she'll go one better than that. She'll tell you the men who know, smoke Edgeworth!

No two ways about it, you do get a doubly satisfying smoke when you fill up your pipe with this famous old blend. It's a happy combination of choice burleys—cut long to give you

a cool, slow-burning smoke. And its mellow flavor and rich aromahavemade Edgeworth the favorite pipe tobacco on 42 out of 50 campuses.

Help yourself to a pipeful next time someone pulls Edgeworth out of his pocket. Pick up the familiar blue tin yourself at any good tobacco stand. Or for a special free sample packet write to Larus & Bro. Co., 105 S. 22d St., Richmond, Va.

She likes a pipe—for you!
